Age of Discovery: Navigating the Risks and Rewards of Our New Renaissance, published Bloomsbury and St Martin's Press, is out now. Da Vinci, Columbus, Copernicus, Luther, Gutenberg. These names recall an era in which an unprecedented rush of discovery and disruption broke through long-standing barriers and broke down equally long-standing powers.

Age of Discovery - Ian Goldin

The era known as the Age of Exploration, sometimes called the Age of Discovery, officially began in the early 15th century and lasted through the 17th century. The period is characterized as a time when Europeans began exploring the world by sea in search of new trading routes, wealth, and knowledge. The impact of the Age of Exploration would permanently alter the world and transform geography into the modern science it is today.

A Brief History of the Age of Exploration

The Age of Discovery, or the Age of Exploration (approximately from the beginning of the 15th century until the middle of the 17th century), is an informal and loosely defined term for the period in European history in which extensive overseas exploration emerged as a powerful factor in European culture, most notably the discovery of the Americas, and during which time was the beginning of ...

Age of Discovery: Navigating the Risks and Rewards of Our ...

The back-staff was invented by John Davis in 1590 and it allowed the navigator to stand back from the sun and work with the shadows. It was a great invention for one of the problems with the cross-staff was that you have to look at the sun and this led to blindness and damage to the navigator's eyes but, the back-staff worked with the shadows of the sun which helped obtain altitude.
