Evidence of oil spraying out of the bleed valve of an Allison 250 C20 engine should lead you to suspect an oil leak from the carbon seal for the No. 1 bearing at the front of the compressor.

Common maintenance events on the Allison 250 C20 ...

One of Allison's most successful projects is the Model 250 turboshaft/turboprop engine family, which was started by the company in the early 1960s, when helicopters started to be powered by turbine, rather than reciprocating, engines. Allison turbine engines were used to power Bell 206 Jet Ranger and Long Ranger helicopters as well as the ...

Allison Engine Company - Wikipedia

Two-shaft modular design featuring a two-stage LP turbine, two-stage HP turbine, and a gearbox with 6,000rpm output. Compressed air is routed to the aft end of the engine for combustion, with exhaust gases exiting from the middle of the engine.

M250 turboshaft - Rolls-Royce

The Allison 250 is the world's most successful small gas turbine engine. It was first produced in 1959, the design horsepower was 250 BHP. The engine was built at a time when most gas turbine manufacturers thought there would not be a market for such a small power plant and expected this role to be served by piston engines.
