Catastrophe is not always avoidable Although there is evidence that some volcanic catastrophes have been mitigated due to prevention, preparation and prediction strategies, this is not always the case. Students should emphasise how the ability of a country to prevent and manage volcanic hazards is strongly dependent on its economic development.

Wildfire preparation, recovery and insurance Threatening flames can spread in an instant. Make a plan to help keep you and your belongings safe, see how to recover afterward and how insurance may help protect you.

Wildfire Preparation and Recovery | Allstate
Mitigation and Prevention are used as synonymous. Some expert prefers to drop the term Mitigation and use only Prevention. Mitigation means to reduce the severity of the human and material damage caused by the disaster. Prevention is to ensure that human action or natural phenomena do not result in disaster or emergency.
