An early V3F system based on an existing general purpose VVVF design. The drives are most often configured for open-loop, geared traction systems in sizes 5.5kW, 11kW, 15kW & 22kW controlled by the TMS50, 375 Microcomputer. By changing the firmware of the standard drive, KONE customised the units to offer a very efficient and safe variable speed drive package.

Motion Control | Power Transmission - Cone Drive

The drive is intended as a component for professional incorporation into complete equipment or a system. If installed incorrectly, the drive may present a safety hazard. The drive uses high voltage and currents, carries a high level of stored electrical energy, and is used to control equipment which can cause injury.

Unidrive User Guide (Iss9) - VFD, Inverters, & AC Drives

1. Drive the car approximately 500 mm above the buffer. Open the latch release to engage the safety gear. The safety gear must engage. 2. Drive the car downwards to ensure that the safety gear has engaged fully. Drive the car downwards until the man riding hoist rope is slack. 3. Press the upper part of the ASGT down. 4.
