Really nice repair guide! There's no way I would have gotten this right without your help, but after following your guide my computer works like a million bucks. I had gotten so used to the fan running full speed all the time I almost didn't notice it anymore, but with the new heat sink the fan runs a low speed once again and the computer is nice and quiet like it was when it was new.

Find the right power adapter and cable for your Mac ...

One late night I opened up my trusty MacBook Pro only to find it turned off. "That's odd, I never turn it off. Must have ran out of battery or something". Without a further thought, I pressed the power button and the computer promptly started booting up. Since I had an SSD, this process would only take a few moments... but not this time.
