[[Figure]]] PHOTO: DAVID SHARPE All available evidence suggests that over 60% of new Ph.D.s in science in the United States will not have careers in academic research, yet graduate training in science has followed the same basic format for almost 100 years, heavily focused on producing academic researchers. Given that so many students will not join that community, the system is failing to ...

Education experts said Oct. 4 that the United States may be overdue for a science education overhaul like the one undertaken after the Soviet Union launched the Sputnik satellite 50 years ago, and predicted that a window for change may open as the Iraq war winds down.

### How Sputnik changed U.S. education - Harvard Gazette

Rethinking "Diversity," Rethinking College Education. The COVID-19 pandemic, regardless of what you may think about its origins, its lethality, or the response, has delivered a body blow to business as usual in American higher education. The economic model that operated up until a few months ago is broken forever.

### Rethinking Diversity Bureaucrats, Rethinking College Education

Last year, 8,411 science and engineering journals published just over 1.1 million peer-reviewed articles. Another 190,000 papers were published in 3,016 social science journals. This works out to more than two peer-reviewed articles being published every minute of every hour of every day for the entire year. These staggering numbers should change how we think—and [...]
