Bone mineral density (BMD) calibration in Skyscan CT- analyser  
Bone mineral density (BMD) is defined as the volumetric density of calcium hydroxyapatite (CaHA) in terms of  $\text{g.cm}^{-3}$ . It is calibrated by means of phantoms with known BMD.

The Skyscan 1176 system is a live animal X-ray microtomography system which enables high-resolution 3D imaging of anaesthetised mice or rats using low X-ray doses. The system is able to provide morphological detail of tissues including bone, muscle and fat while contrast agents can be used to produce 3D
