T he first time I worked with rodents, I was a high school student doing a neuroscience research project at the University of South Alabama. In order to get clear brain histology, we had to perfuse the animals with saline. This means that the rat, a big, white animal, was injected with some kind of anesthesia, and we watched it run around a plastic tub until it became loopy and clumsy and ...

Sacrifice - When scientists have to kill

In this insight I'm going to talk about two of the first science experiments in recorded history. One was allegedly performed by the Prophet Elijah in Israel in the 800s BC [1], the other by the Pharaoh Psammetichus in Egypt in the 600s BC [2]. In each case, we only have one primary source from long after the fact, so it is not necessarily the experiments themselves that are the world's ...

They use the terms interchangeably throughout the text and (perhaps unintentionally) repeat a ploy used by the animal lab public relations departments to imply that those who oppose animal experimentation must also oppose medicine, geology, physics, chemistry, astronomy, botany, ethology and every other branch of science. All in all, The Sacrifice would be a worthwhile text for use in a classroom or study group.
