Subaru Engine Building MasterClass - YouTube

High Compression Pistons for EJ25 SOHC This is more or less a reference post for those interested in high compression piston options. I have an SOHC 2.5 that I m rebuilding and the #4 piston/wrist pin had some excess wear and the corners of the skirt dug into the bore a little bit, safest option is to go oversized (100mm).

High Compression Pistons for EJ25 SOHC

Installing Pistons Subaru Engine Sohc - modapktown.com

Types of Subaru Engines. The first Subaru Engine used in the US is the E series. Most Subarus you see on the road today have an EJ, and in 2011, Subaru introduced a completely redesigned engine, the F series. FA and FB engines are beginning to replace all EJ engines, with only the EJ257 still in the STI as of 2019.

Everything you need to know about your Subaru Engine ...

JASPER Offers Remanufactured Subaru 2.5L SOHC Boxer Engine ...

The Subaru EJ engine is a series of four-stroke automotive engines manufactured by Subaru.They were introduced in 1989, intended to succeed the previous Subaru EA engine.The EJ series is the mainstay of Subaru's engine line, with all engines of this series being 16-valve horizontal flat-fours, with configurations available for single, or double-overhead camshaft arrangements (SOHC or DOHC).

Subaru EJ engine - Wikipedia

OK! regarding piston rod direction, some folks say to install the Rods with bearing tang down (facing crankshaft forward). However this theory does not make much sense, because this is a boxer engine. This is why when you have all the rods with tangs facing down....only #1 and #4 will be correct #2 and #3 will be facing up.

which way do the conn. rods face ? - NASIOC

The original Subaru piston has almost no skirt, causing the cylinder bore to wear in the middle, eventually causing "piston slap". We use Hastings piston rings, which are very high quality rings. The engine comes with a new factory Subaru High Volumn Oil Pump. This is the oil pump that Subaru uses in their EJ25 Turbo Engines.

To add to what I put in bold in the above paragraph, the pistons on a 96 to early 99 legacy ej25D protrude out of the block just a bit hence the reason for the slightly thicker head gasket which would be around 0.058" or 1.4 mm compared to the 0.040" that the sohc 99+ newer ej251 engines come with.

The EJ25D power is 155 HP at 5,600 rpm. In 1997 pistons were modified, and power increased to 165 HP. This motor was used for Subaru till 1998, then it was replaced by EJ251 engine. EJ251 belongs to Phase 2 and it used new SOHC heads, one camshaft for each. Also new moly coated pistons were used, and compression ration was increased to 10.1.

Subaru EJ25 Engine | Tuning guide, main problems, specs

So I bought a 99 sohc EJ25 Forester with a bad motor, which will eventually be my wife's car. When I bought it it would run at idle, but just barely. It pretty much sounded like an extremely bad rod bearing, which it was. Pulled the motor and broke it down to find the oil pickup screen almost...

Total Rebuild 99 sohc, Oversized Pistons | Subaru Forester ...

(The plugs are removed to gain access to the piston wrist pins when the pistons are set to "bottom dead center".) I believe the plugs close openings into the crankcase area. Seems to me it would take quite a leak to get oil past the gasket and the thread sealant, especially as that shouldn't be a high oil pressure area.
