Manual override: Most of the Lofrans horizontal windlasses are supplied with manual override which makes the windlass capable of chain recovery in the case of electrical failure. The manual override has the secondary function to provide a safety mechanism so that chain jams do not damage the deck. Independent drum from the Gypsy: Horizontal models give the choice of utilizing the drum for warping operations independently from the Gypsy.

### Lofrans' Anchor Horizontal Windlass

A windlass is the backbone of any anchoring system. Imtra offers the complete range of anchor windlasses from Lofrans and Muir, the world's leaders in anchor windlasses. Choose from horizontal, vertical, electric (DC or AC), hydraulic or manual - every variation to meet your specific needs. The right anchor windlass makes all the difference.

### Anchor Windlass Solutions | Lofrans & Muir | Imtra

To ensure your Lofrans Windlass operates properly, you need to install: A control box unit - either supplied separately as standard or built in to the motor. The Lofrans Control box = two coils in watertight box rated IP56. Separate Control Box units come with integral fasteners which should be sufficient to connect with a remote of your choice.
