Case management is now considered a pivotal component of long-term care service delivery and as a likely adjunct to primary care in managed health care systems (Grower, 1997; Kane, 1985). Inpatient and nursing home case-management teams may also be gaining prominence. The utility of case management is based more on

Case Management, Client Risk Factors, and Service Use

Statistics for Management Case Studies offers applications of statistical data analysis to take a decision. Statistics is the science of estimates and probabilities. Further, W.I. King has defined Statistics in a wider context, the science of Statistics is the method of judging collective, natural or social phenomena from the results obtained by the analysis or enumeration or collection of estimates.

AN INTRODUCTION TO BUSINESS STATISTICS

A project of case management was assigned to a given type if it shared at least half of the response modalities of that particular type [32]. In total, 9 % were allocated to the Type 1 case management, 41 % to the Type 2 case management and 50 % to Type 3.
