Question Answering System Ppt - delapac.com
Question answering is very dependent on a good search corpus—for without documents containing the answer, there is little any question answering system can do. It thus makes sense that larger collection sizes generally lend well to better question answering performance, unless the question domain is orthogonal to the collection.

It contains 6794 training and 5674 test question-answer pairs, based on images from the NYU-Depth V2 Dataset. That means about 9 pairs per image on average. Although it is a great initiative, the NYU dataset contains only indoor scenes with, sometimes, lightning conditions that make it difficult to answer the questions.

Introduction to Visual Question Answering | Tryolabs Blog
Question Processing receives the input from the user, a question in natural language, to analyze and classify it. The analysis is to find out the type of question, meaning the focus of the question. This is necessary to avoid ambiguities in the answer (Malik et al., 2013).The classification is one of the main steps of a QA system.
