The Sanford Guide to HIV/AIDS Therapy, by Jay P. Sanford. 4.50 · Rating details · 4 ratings · 1 review. Care of the HIV infected patient is becoming increasingly complicated and today most patients are managed by teams of health care providers that focus on HIV/AIDS. This approach has been highly successfull with a marked reduction in mortality rate and diminished progression to symptomatic AIDS.

PAVE: Partnerships for Action, Voices for Empowerment

AIDS refers to the most advanced stages of an HIV infection. It is a complex condition caused by the human immunodeficiency virus (HIV), which damages the immune system and affects the body's ability to fight infection and disease. People with damaged immune systems are at risk for diseases that do not threaten people with a healthy immune system.
