Trane's split system has quality and reliability built-in. An indoor section and matching outdoor section are connected by refrigerant tubing (hence the name "split"). The indoor section consists of a fan, indoor cooling coil, heating section, and filter while the outdoor section houses the compressor and condenser.

Split System | Trane Commercial

Design a split system using Trane's extensive line of compatible split system components: outdoor compressor and condenser units, and indoor components that house the air handler, fan, cooling coil, optional heating section and filter. We can help configure the right system to meet a broad range of load
